## **Other Business**

### **Master Plan**

Plan organization: discussion of the names, contents and order of chapters will be covered in a future meeting.

### **Transportation**

NRPC is continuing its work on our transportation chapter. The board reviewed the latest iteration of the chapter. There is ongoing discussion on the sections for Objectives and Planning Board Recommendations and What has been Achieved. The report contains several maps and charts, mostly derived from state transportation data:

- State Aid Classifications and Mileage
- Functional Classifications
- Level of Service on State Maintained Roads
- Fatal/Non-Fatal Automobile Crashes and Crashes Involving a Pedestrian
- Cost of Maintenance of Gravel Roads
- Average Annual Daily Traffic, 2006 - 2019

The data from last month's traffic counts is interesting. Compared to the 2006 traffic counts, traffic is lower in all locations. The highest count is Brookline Rd at the Brookline Town Line (1363), followed by Abbott Hill Rd at Wilton Town Line (398). Next is Townsend Road North of Hurricane Hill Road (253), Hurricane Hill Rd North of Briggs Rd (190), Greenville Rd at Greenville Town Line (171), Starch Mill Rd North of Russell Rd (169) and Wilton Rd North of Pullman Rd (148).

### **Capital Improvements Plan**

Background data that can be used for the CIP is being gathered from town departments. However, work to pull these together into a formal plan will be postponed while master plan work is in progress.
